

ZMA Applications With Multiple Owners

This form provides a method for additional landowners to sign an application form for a multi-owner zone map amendment. One landowner must sign the primary form as the representative of the group and confirms accuracy of the submittal, which must be notarized. Each additional landowner must sign this supplemental signature sheet and provide the information required on this form. Each owner of a property must sign; this may require multiple signatures for jointly owned property like properties owned by spouses, an LLC, or a condominium, for example. Each field on the form for each property must be completed. The geocode for a property may be found on a property tax bill, Montana Cadastral service at <https://svc.mt.gov/msl/cadastral/>, or county tax records.

A map with a numbered key per property needs to be attached and the number of each property entered next to the applicable signature. See the example at the end of the form. Print and have signed as many sheets as needed to contain the necessary information for the application

Project Name: _____

Additional Signatures

All owners of record must sign. Original/wet signatures required.

I hereby certify that I am the owner of record of the subject property(ies) described on this application and that I consent to the filing of the action requested herein. All property owners of record must sign the application.
